About Me

Senior Software Developer with **4+ years of experience** building scalable, high-performance web and mobile applications using **React.js, Next.js, Node.js, Nest.js, TypeScript, and React Native**. Experienced in architecting **real-time systems**, optimizing performance, and developing responsive user-centric products for healthcare, fintech, cloud, and enterprise platforms. Proven track record of **reducing operational response times**, building reusable and scalable architectures, and delivering **end-to-end production-ready solutions** in agile environments.

Education

B.Tech School Of Engineering & Technology - Jain University, Computer Science

Bangalore
July 2017 – July 2021

Experience

RED.Health, Senior Software Developer

Bangalore

Feb 2024 – present
2 years 5 months

- Architected and developed a scalable Uber-like real-time ambulance dispatch platform utilizing a NestJS microservices architecture, enabling intelligent auto/manual workflows, keyboard-first operations, and live vehicle tracking.
- Reduced ambulance dispatch time by 70% (15 min → 2–5 min) by optimizing backend dispatch algorithms and implementing an event-driven arch with PubSub and NestJS event emitters.
- Built highly responsive frontend modules using React.js, Next.js, and React Native, seamlessly integrating them with scalable REST APIs exposed via a centralized backend API Gateway.
- Engineered real-time operational dashboards with live state synchronization, utilizing WebSockets and microservice-to-microservice communication to improve emergency coordination and operational visibility.
- Optimized full-stack system performance by implementing efficient state management on the frontend and caching strategies with Redis and database indexing within the NestJS backend.
- Supported scalable mobile-first operations by building high-throughput endpoints to ingest background location tracking data, ensuring 99.9% uptime for emergency routing.
- Technologies:** React.js, Next.js, Node.js, Nest.js, React Native, PubSub, PostgreSQL, AWS, Redis

RevDau, Software Developer

Pune

July 2023 – Jan 2024
7 months

- Built enterprise-grade **real-time data visualization platforms** for Aditya Birla Group using WebSockets, enabling live operational monitoring and faster decision-making.
- Developed an interactive **cloud infrastructure design platform** using React Flow for creating AWS and Azure architecture diagrams.
- Designed and implemented intuitive **drag-and-drop dashboard workflows** using FormKit, improving user engagement and reducing onboarding complexity.
- Created reusable UI components and scalable frontend architecture to support large enterprise workflows.
- Integrated real-time APIs and optimized frontend performance for smooth rendering of dynamic live data streams.
- Collaborated with cross-functional teams in agile development cycles to deliver scalable enterprise solutions.
- Technologies:** React.js, Next.js, Angular, TypeScript, PHP, WebSockets, AWS, Azure, MySQL

nDimensions, Full Stack Developer

Udaipur

Apr 2022 – June 2023
1 year 3 months

- Developed scalable **analytics dashboards** for political organizations with advanced sorting, filtering, graphical visualizations, and tabular reporting systems.
- Built responsive **Shopify landing pages** with optimized UI/UX and mobile-first design principles.
- Developed end-to-end Shopify workflows for brands reflexions.in & jblondon.store.
- Improved frontend responsiveness and user experience using reusable components and modern JavaScript practices.
- Worked across frontend and backend systems to integrate APIs, manage data flow, and support scalable production deployments.
- Technologies:** React.js, JavaScript, HTML5, CSS3, PHP, Shopify, REST APIs

Razorpay, Software Engineer

Bangalore (Remote)

July 2021 – Mar 2022

9 months

- Integrated and maintained **banking APIs** for payment workflows, improving platform reliability and reducing onboarding effort for new bank integrations.
- Migrated legacy banking integrations to scalable modern implementations with improved maintainability and performance.
- Developed internal **bank simulator platforms** to accelerate development, testing, and QA workflows.
- Collaborated with backend and product teams to support **high-scale fintech transaction systems**.
- Worked in fast-paced agile environments with focus on scalability, API reliability, and production stability.
- **Technologies:** Golang, PHP, Laravel, REST APIs, MySQL

Projects

Research Paper - AI and ML based Machine in HealthCare

- Published **research paper** focused on disease prediction, emergency healthcare assistance, and hospital recommendation systems using **AI and Machine Learning**.
- Implemented healthcare-focused predictive workflows and intelligent emergency response concepts.
- **Paper ID:** IJRASET34397
- <https://www.ijraset.com/fileserve.php?FID=34397>

Shield Helvetia

- Designed and developed a responsive and professional business website with modern UI/UX principles and optimized frontend performance.
- Built reusable UI components and responsive layouts for improved accessibility across devices.
- **Technologies:** React.js, Node.js, Express.js, MongoDB
- <https://shield-helvetia.netlify.app/>

Admin Sales Dashboard

- Developed a scalable **React.js sales analytics dashboard** with interactive charts, filters, sorting, and reusable UI components for efficient business reporting.
- Optimized frontend rendering and state management for smooth user experience.
- **Technologies:** React.js, Node.js, Express.js, MongoDB
- <https://github.com/siddnlw/react-dashboard>

Covid-19 Tracker

- Built a **real-time Covid-19 tracking application** with dynamic data visualization, sorting, filtering, and responsive dashboards for India-wide analytics.
- Implemented REST API integrations and optimized rendering for real-time updates.
- **Technologies:** React.js, REST APIs
- <https://github.com/siddnlw/covid-19-tracker>

Technologies

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), React Native, Redux, Zustand, Tailwind CSS, Vite, Angular

Backend & APIs: Node.js, Nest.js, PHP, Laravel, Golang, REST APIs, WebSockets

Cloud & Infrastructure: AWS, Azure, GCP, Docker, Kubernetes, CI/CD

Databases: PostgreSQL, MySQL

Tools & Platforms: Git, GitHub, Figma, Shopify, PubSub, React Flow, FormKit

Concepts: Microservices, Performance Optimization, State Management, Real-time Systems, Scalable Architecture, Component-Based Development, Agile/Scrum, Cross-functional Collaboration
